

RENEWEEEX GLOBAL 2026

"Empowering Growth, Sustaining the Planet –
Renewable Energy for a Brighter Tomorrow."

29-30-31 July 2026

**IICC, Yashobhoomi Dwarka
Sec - 25, New Delhi, India**

ABOUT US

The Renewable energy Global Expo 2026 is a platform to provide business opportunities to Solar panel manufacturers, Importers, Traders, Solar Products and allied industry professionals, Technology and installation system to showcase latest technology and equipment at this platform in india. The event will attract thousands of visitors from the industry and urban rural residents which will help to grow the business fastly and also brand building within the general public.

The indian solar market is estimated to be at 18,845 MW by the end of 2024. It is projected to reach 41,778 MW by 2028, registering a CAGR of over 22.99% during the forecast period. Over the long term factors such as increasing demand in the commercial & industrial sectors and government emphasis on renewable energy integration are expected to be significant drivers for the market. On the other hand, slow paced installation of rooftop projects may likely restrain the growth of the indian rooftop solar market over the coming years. Nevertheless the untapped solar potential and focus on increasing decentralization would enable residential & industrial customers to rely less on central grids, which is seen as an opportunity during the forecast period. Due to the rise of industrial activity in india industry power demand may increase. As a result, Solar installation would be robust option for enterprises to become self-reliant, which is expected to expand the Solar market in india.

**Committed to Powering
a Sustainable Future**

EXHIBITOR PROFILE

VISITOR PROFILE

- Solar panel manufacturers
- PV tracking system
- Renewable heating
- Smart grid
- Solar trackers
- Solar inverter
- Solar pump
- Solar cells manufacturers
- Solar thermal engineering
- Solar water heating / Cooling system
- Testing equipment manufacturer
- Battery manufacturers
- Epc companies
- Roof mounted PV systems
- Solar charger
- PV systems providers
- Manufacturers, suppliers, distributors and service providers
- System providers and integrators
- Project developers/EPC contractors
- Providers of grid infrastructure and solutions for the integration of renewable energy
- Certification institutes
- Research and development institutes
- Associations/societies
- Trade media, publishing
- Financial services

- Installers and integrators
- Project developers/EPC contractors
- Manufacturers and suppliers
- Distributors
- Energy consultants
- Utilities
- Investors and analysts
- Architects/energy planner
- Government officials/decision-makers
- CEO`s COOs, Md`s and Director's
- Chief Engineers
- Construction and Engineering Companies
- Consultants
- Field Operators
- Government Authorities
- Heads of Capital Projects
- MEP and EPC Contractors
- Operations and Maintenance Departments
- Power system and utilities professional
- Renewable energy consultants
- Environment Agencies
- Government officials
- Technology Developers
- Industrialist and distributors
- Builders and construction company
- Architects & engineers
- Consumer
